CAN WASHBOARD SOAP MAKE YOU SICK?

LIN 4
Refillable bulk soap dispensers are contaminated!

HOW DOES IT HAPPEN?
Bacteria from fecal matter and other sources can grow inside the dispenser.

- You can’t clean the contamination away… even with bleach.

SO WHAT?
Hands can have 25 times more germs after washing with contaminated soap.

- Hands can have 25 times more germs after washing with contaminated soap.

Refillable bulk soap dispensers are contaminated.

There’s a safe alternative.
